Create Photo Gallery link in your NavSidebar and make it a Headline. The Link to box remains empty.

Insert a new Row below the Photo Gallery row and give it a name.

Go to the toolbar across the top and add New Site Object

Name it (remember short and sweet)

Select Graphics gallery container then close.

Click on the named folder that you created earlier located along the left side

Locate your pictures and drag pics to folder.

Save.

NOTE: RWD places a sample pic in the graphics gallery, you probably want to delete that.
